EXPERIENCE

Public Health Analyst

Association of State and Territorial Health Officials, Arlington, VA

Senior Analyst, Infectious Disease

Oct 2022 – Present

Analyst, Infectious Disease

May 2021 – Sept 2022

- Develop and deliver impactful presentations, one-pagers, reports, blog posts, and thought leadership pieces on infectious disease topics, effectively communicating key issues and project outcomes to diverse audiences.
- Conduct rapid-response research to provide technical assistance to state and territorial health agencies, supporting them in addressing urgent challenges.
- Monitor the status of state legislation, regulations, and federal agency actions related to infectious disease, actively contributing to the development of written content that summarizes key considerations and impacts on ASTHO member jurisdictions.
- Provide comprehensive project management support by drafting grant proposals, detailed work plans, and interim progress reports, successfully securing and managing over \$6,000,000 in funding.
- Cultivate strong relationships and serve as a liaison with external partners, including federal and state agencies, affiliate organizations, project consultants, and community-based organizations, fostering effective collaboration and synergy.

Public Health and Medical Preparedness Intern

Jan 2021 – Apr 2021

Florida Department of Health in Monroe County, Tavernier, FL

- Spearheaded the development and implementation of a comprehensive logistics and workflow plan for the establishment of a mass point of dispensing (POD) for COVID-19 vaccination in a jurisdiction of over 74,000 residents, ensuring efficient and timely administration of vaccinations to the community.
- Coordinated the creation of an annex consisting of 70+ faith-based partners, effectively leveraging their support and willingness to assist in current and future response activities, enhancing the overall preparedness and response capabilities of the organization.
- Assisted in the update of the Emergency Operations Plan, addressing contingencies and demographic risk considerations to ensure the organization's readiness and ability to respond effectively to public health emergencies.

Research Assistant

Aug 2019 – May 2020

Department of Biobehavioral Nursing, University of Florida, Gainesville, FL

- Led the data management and tracking efforts for three distinct protocols involving over 200 participants, including overseeing data collection, analysis, and interpretation to contribute to the understanding of patient outcomes.
- Successfully managed the scoring, data entry, and cleaning processes for more than 100 data points per enrollee within REDCap and OnCore platforms, facilitating reliable analysis and reporting of findings.
- Streamlined the audit of over 150 patient files, implementing efficient processes to ensure adherence to protocol requirements and the reliability and integrity of the research data.
